LIAM

YOUNG

“HELLO, CITY!” **Tid** 8/12, 18:00. **Plats** Arkitekturskolan KTH, sal 108. **Info** Join speculative architect Liam Young and an all-seeing smart city operating system as they take a tour in a driverless taxi through a network of software systems, autonomous infrastructures, ghost architectures, anomalies, glitches, and sprites, searching for the wilds beyond the machine. The talk will be an audio-visual expedition to a city found somewhere between the present and the predicted, the real and the imagined, stitched together from fragments of real landscapes and designed urban fictions. Läs mer på www.liamyoung.org. **Arrangör** Stockholms Arkitektförening genom Frida Rosenberg i samarbete med Arkitekturskolan KTH/Studio 5.
